

Objective

Dedicated and detail-oriented Quality Engineer with 2+ years of experience in SMT and through-hole manufacturing, focusing on quality assurance and process control. Skilled in audits, defect analysis, and continuous improvement methodologies. Seeking a challenging role to enhance product quality, improve process efficiency, and contribute to high-standard manufacturing operations.

Core Skills

Quality Assurance Management | Internal Audit (IATF 16949, ISO 9001:2015) | APQP | PPAP | Process FMEA | Control Plan (CP) | Process Flow Diagram (PFD) | 7 QC Tools | 8D Methodology | Root Cause Analysis | SPC | MSA | KPI Monitoring & Reporting | IPQC | Poka-Yoke Implementation | 5S & Kaizen | Trainer & Coordinator

Technical Skills

SMT Operations | PCB Assembly | Reflow Profiling | Wave Soldering | SMT Machine Programming (SPI, Pick & Place, Reflow, AOI) | SMT Equipment Operation | Defect Analysis | NPI & Line Validation | ECN / PCN Implementation | Process & Product Audits | ESD & MSD Standards & Audits | IPC 610-G | Documentation (SOP, WI, Reports) | MS Office

Professional Experience

Kaynes Electronics Manufacturing Pvt. Ltd | Hyderabad

SMT Engineer in (QC)

Nov 2025 - Present

- Ensure product audit results align with the Product PFD (Process Flow Diagram) and Control Plan requirements.
- Monitor and review KPIs on a daily basis; implement corrective actions when targets are not achieved.
- Conduct scheduled process audits (ESD, MSD, Wave Soldering, Magazine loader, vacuum loader, SPI, Pick & place, Reflow, Soldering, AOI, 5S, etc.) and ensure timely closure of corrective actions for non-conformities.
- Approve process setup in accordance with the Control Plan.
- Perform First Article Inspection (FAI) / first board approval as per BOM specifications.
- Collaborate with cross-functional teams to resolve recurring line failures using 8D methodology and 7 QC tools, ensuring effectiveness and sustainability of actions.
- Drive implementation of Poka-Yoke (error-proofing) solutions in the manufacturing line.
- Handle customer complaints and implement corrective and preventive actions using structured problem-solving tools (8D, 7 QC tools).
- Ensure closure of SPC alarms in the SMT manufacturing line.
- Support new line setup and implement engineering and process changes (TCN, ECN, PCN, SCN).
- Prepare and update product-related documentation (Procedures, Work Instructions, SOPs, Setup Approval Reports, SMT & Through-hole Process Reports, CTQ guidelines, Inspection Reports) as required.
- Generate and present daily, weekly, and monthly yield and performance reports to top management.

Key Achievements

- Responsible for Overall QA Activities in SMD floor
- KPI Review and Updating
- Plan and implementation of NPI with supporting Documents
- Responsible for ECN, PCN, Implementation
- Responsible for Line Validation, NPI Validation.
- FMEA, CP Review
- Reviewing IPQC Audit and implementing the reviewed result

- Proficient in BOM verification to ensure accurate component identification and assembly.
- Experienced in SMT equipment operation and programming (SPI, AOI, pick-and-place machines).
- Strong knowledge of SMT processes and quality control, with hands-on expertise in defect analysis and process optimization.
- Skilled in root cause analysis and implementing corrective actions to reduce defects and improve first-pass yield.
- Experienced in handling MSL components, including proper storage, baking, and defect prevention; implemented 5S practices for workplace efficiency.
- Well-versed in industry standards (IPC-A-610, ISO 9001, IATF 16949, RoHS) to ensure product quality and compliance.
- Proficient in preparing and maintaining technical documentation, including SOPs and quality reports.

Training Program Attended

ISO 9001-2015 internal Auditor training | QMS Training | IATF internal Auditor Training | 5S Training | Road Safety | Knowledge in industrial Safety & Fire.

Area of Interest

QA/QMS | Customer Complaint Handling | Testing

Academic Qualifications

JB Institute of Engineering and Technology, Hyderabad
Bachelor of Technology | EEE | CGPA - 8.7

2019 - 2023

Narayana Junior College, Hyderabad
Telangana Board of Intermediate Education | CGPA - 8.9

2017 – 2019

Blue Blooms Grammar School, Hyderabad
Telangana State Board of Secondary Education | CGPA – 8.3

2016 – 2017

Projects

- ✓ **Energy Regeneration System for Electric Vehicles Using DC-DC Converter with Super Capacitor**
-Academic Project
Developed an energy regeneration system for EVs using a DC-DC converter and super capacitor to optimize braking energy recovery, enhance power management, and extend battery life.

Achievements & Activities

- ✓ Pass qualification of new products for first time (NPI) |
- ✓ 100% on time delivery of new products to customer.
- ✓ Zero customer escalation.
- ✓ Zero Scrap in production.
- ✓ Successfully completed a project

Declaration:

I hereby declare that the above information is true and correct to the best of my knowledge and belief.
